[psavidis.github.io/resume](https://psavidis.github.io/resume)

Software Engineer | Java Specialist | Architecture & Design | Remote Worker

## Summary

Welcome to the PDF version of my resume. For the live, coded experience, visit the link or scan the QR code 🙌

- Feel free to **Connect** with me via email or LinkedIn to explore potential business opportunities
- **Download** my resume in PDF format
- **Search** through my projects using simple keywords

Outside of work, I'm passionate about traveling, making music, reading philosophy, and swimming.

**Fun Fact:** I've got dual citizenship 🇬🇷 🇦🇺

## Experience (12+ years)

### Software Engineer @ Camunda

April 2023 – April 2025

Athens, Greece

Remote

### Senior Software Engineer @ Cortical.io

August 2020 – December 2022

Vienna, Austria

Hybrid

### Software Engineer @ Upstream

March 2016 – June 2020

Athens, Greece

On-site

### Software Engineer @ European Dynamics

December 2012 – December 2015

Athens, Greece

On-site

### Army Duties @ Hellenic Army

October 2011 – July 2012

Athens, Greece

On-site

## Projects

### Camunda Platform 7 - The Open Source BPMN platform ★ OPEN-SOURCE

Camunda Platform 7 is an open-source process automation engine trusted by thousands of companies worldwide. Built for Java and accessible from any language via REST, it embeds a high-performance BPMN 2.0 engine into any app or container. It integrates seamlessly with Spring, Java EE 6, Quarkus, and a wide range of databases to orchestrate workflows at scale.

- Individual Contributor to the Camunda 7 Project between April 2023 and April 2025
  - My contributions can be found between 7.20.0 and 7.23.0 Releases
- Feature Development for Open Source / Enterprise Edition
- Community Worker
  - Managed the community contributions
  - Reviewed and Scoped Security vulnerabilities
  - Improved & Stabilized the CI
- Alpha and Minor Release Management
- Worked on C7 to C8 Data Migration

My Commits

04-2023 - 04-2025

## Contract Intelligence & Services

Contract Intelligence and its platform services offer an IDP solution for extracting data from documents and classifying them with different algorithms (proprietary, open source).

- Lead Developer for Refactoring the Main Product of the company using a DDD inspired approach
- Redesigned & Implemented Platform Services to be configurable (turned it into microservice).
- Designed, Implemented & Tested Connectors, a flexible, scalable, fault tolerant microservices system to connect the Products to documents of various Cloud storage solutions Sharepoint, Box, Dropbox etc.)
- Played a key role in the recruitment process by conducting interviews and assisting in the selection of qualified developers.
- Mentoring & Coaching
