Software Engineer | Java Specialist | Architecture & Design | Remote Worker

Summary

Welcome to the PDF version of my resume. For the live, coded experience, visit the link or scan the QR code

- Feel free to **Connect** with me via email or LinkedIn to explore potential business opportunities
- Download** my resume in PDF format
- Search** through my projects using simple keywords

Outside of work, I'm passionate about traveling, making music, reading philosophy, and swimming.

Fun Fact: I've got dual citizenship

Experience (12+ years)

Backend Engineer @ Camunda

April 2023 – April 2025

Athens, Greece

Remote

Senior Software Engineer @ Cortical.io

August 2020 – December 2022

Vienna, Austria

Hybrid

Software Engineer @ Upstream

March 2016 – June 2020

Athens, Greece

On-site

Software Engineer @ European Dynamics

December 2012 – December 2015

Athens, Greece

On-site

Army Duties @ Hellenic Army

October 2011 – July 2012

Evros, Greece

On-site

Projects

Camunda Platform 7 - The Open Source BPMN platform ★ OPEN-SOURCE

Camunda Platform 7 is an open-source process automation engine trusted by thousands of companies worldwide. Built for Java and accessible from any language via REST, it embeds a high-performance BPMN 2.0 engine into any app or container. It integrates seamlessly with Spring, Java EE 6, Quarkus, and a wide range of databases to orchestrate workflows at scale.

- Individual Contributor to the Camunda 7 Project between April 2023 and April 2025
 - My contributions can be found between 7.20.0 and 7.23.0 Releases
- Feature Development for Open Source / Enterprise Edition
- Community Worker
 - Managed the community contributions
 - Reviewed and Scoped Security vulnerabilities
 - Improved & Stabilized the CI
- Alpha and Minor Release Management
- Worked on C7 to C8 Data Migration

04-2023 - 04-2025

Contract Intelligence & Services

Contract Intelligence and its platform services offer an IDP solution for extracting data from documents and classifying them with different algorithms (proprietary, open source).

- Lead Developer for Rearchitecting the Main Product of the company using a DDD inspired approach
- Redesigned & Implemented Platform Services to be configurable (turned it into microservice).
- Designed, Implemented & Tested Connectors, a flexible, scalable, fault tolerant microservices system to connect the Products to documents of various Cloud storage solutions Sharepoint, Box, Dropbox etc.)
- Played a key role in the recruitment process by conducting interviews and assisting in the selection of qualified developers.
- Mentoring & Coaching

Java J2EE JBOSS 5 EJB 2.0 Web Logic Hibernate Struts 1

Project

Benelux Patent Platform

The aim of the platform is to serve as a common system for the National Offices of Intellectual Property of Belgium, Luxembourg and Netherlands.

- Developed the platform's back-office from the ground up (Backend + Frontend)
- Created the search criteria functionality
- Led the data migration from Lucene to Elasticsearch ensuring 100% data correctness

CONSULTING **EXECUTION** **LEAD**
