# **Petros Savidis**

peter.savidis1@gmail.com psavidis.github.io/resume

Software Engineer | Java Specialist | Architecture & Design | Remote Worker

## **Summary**

Welcome to the PDF version of my resume. For the live, coded experience, visit the link or scan the QR code 🔘

- Feel free to Connect with me via email or LinkedIn to explore potential business opportunities
- **Download** my resume in PDF format
- Search through my projects using simple keywords

Outside of work, I'm passionate about traveling, making music, reading philosophy, and swimming.

Fun Fact: I've got dual citizenship

## **Experience**

## **Android Developer** @ Intracom Telecom

On-site

## **Projects**

### Camunda Platform 7 - The Open Source BPMN platform

Camunda Platform 7 is an open-source process automation engine trusted by thousands of companies worldwide. Built for Java and accessible from any language via REST, it embeds a high-performance BPMN 2.0 engine into any app or container. It integrates seamlessly with Spring, Java EE 6, Quarkus, and a wide range of databases to orchestrate workflows at scale.

- Individual Contributor to the Camunda 7 Project between April 2023 and April 2025
- My contributions can be found between 7.20.0 and 7.23.0 Releases
- · Feature Development for Open Source / Enterprise Edition
- · Community Worker Worked on Reviewing community contributions, security vulnerabilities, CI improvements
- · Alpha and Minor Release Management
- · Worked on C7 to C8 Data Migrator PoC

GitHub

**My Commits** 

## **Contract Intelligence & Services**

Contract Intelligence and its platform services offer an IDP solution for extracting data from documents and classifying them with different algorithms (proprietary, open source).

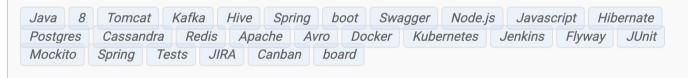

- · Lead Developer for Refactoring the Main Product of the company using a DDD inspired approach
- Redesigned & Implemented Platform Services to be configurable (turned it into microservice).
- Designed, Implemented & Tested Connectors, a flexible, scalable, fault tolerant microservices system to connect the Products to documents of various Cloud storage solutions Sharepoint, Box, Dropbox etc.)
- Played a key role in the recruitment process by conducting interviews and assisting in the selection of qualified developers.
- · Mentoring & Coaching

### **SecureD**

Secure-D detects and blocks even the most sophisticated types of mobile ad fraud securing mobile users and safeguarding mobile operators.

- · Worked in an agile team using a scrum-like schedule, sprint based developing the platform
- Production Support

**Product Website** 

### **Dryad & Medusa**

Dryad is Upstream's pioneering mobile commerce platform.

- · Developed & Maintained Upstream's core products in an Agile team
- · Implemented feature in an event-driven architecture at scale
- Production Support

Project

### **Benelux Patent Platform**

The aim of the platform is to serve as a common system for the National Offices of Intellectual Property of Belgium, Luxembourg and Netherlands.

- Developed the platform's back-office from the group up (Backend + Frontend)
- · Created the search criteria functionality
- · Led the data migration from Lucene to Elasticsearch

MVC Java J2EE **PowerMock** Spring Spring Spring Security **JMS** JUnit EasyMock Hibernate SQL Server 2008 **Tomcat** 7 Maven **REST** Lucene JSON XML **XSLT** Apache Tiles HTML CSS JSP JavaScript **Eclipse Jenkins** JQuery Git Sonar

Belgium

**Netherland** 

Luxembourg

### **Eleura Platform**

Electronic dossier collection of electronic documents and their preparation for upload into the European Parliament's ARCDOC archival system.

- · Developed all the search criteria functionality which was the core business of the app
- Contributed to the development of the rest of the app
- Created a new web interface for PAMAP using XSLT and CSS

### **PAMAP**

PAMAP Physical Activity Monitoring for Aging People is a Health Monitoring and Personal Health Record system.

- Developed mobile client that used PAMAP's infrastructure to access PAMAP's services
- Conducted Research around HL7 protocol to standardize PAMAP's communication so it can easily exchange data with other medical systems
- · Created a new web interface for PAMAP using XSLT and CSS

Java Ant XML XSL HTML CSS JSP Eclipse Android SVN
