Software Engineer | Java Specialist | Architecture & Design | Remote Worker

Summary

Welcome to the PDF version of my resume. For the live, coded experience, visit the link or scan the QR code

- Feel free to **Connect** with me via email or LinkedIn to explore potential business opportunities
- **Download** my resume in PDF format
- Search through my projects using simple keywords

Outside of work, I'm passionate about traveling, making music, reading philosophy, and swimming.

Fun Fact: I've got dual citizenship

Experience (12+ years)

Android Developer @ Intracom Telecom

March 2011 - October 2011

Athens, Greece

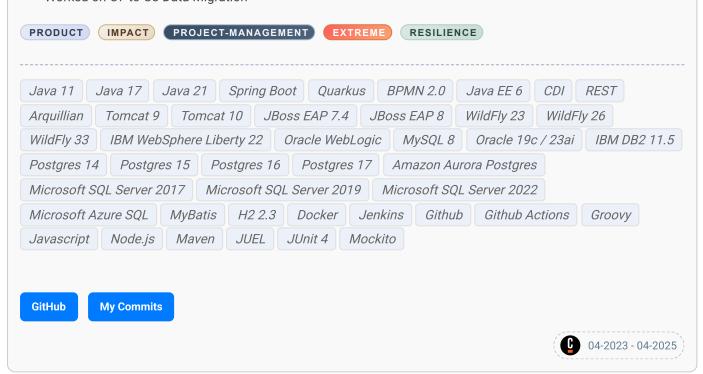

On-site

Projects

Camunda Platform 7 - The Open Source BPMN platform COPEN-SOURCE

Camunda Platform 7 is an open-source process automation engine trusted by thousands of companies worldwide. Built for Java and accessible from any language via REST, it embeds a high-performance BPMN 2.0 engine into any app or container. It integrates seamlessly with Spring, Java EE 6, Quarkus, and a wide range of databases to orchestrate workflows at scale.

- Individual Contributor to the Camunda 7 Project between April 2023 and April 2025
 - My contributions can be found between 7.20.0 and 7.23.0 Releases
- Feature Development for Open Source / Enterprise Edition
- Community Worker
 - Managed the community contributions
 - Reviewed and Scoped Security vulnerabilities
 - Improved & Stabilized the CI
- Alpha and Minor Release Management
- Worked on C7 to C8 Data Migration

Contract Intelligence & Services

Contract Intelligence and its platform services offer an IDP solution for extracting data from documents and classifying them with different algorithms (proprietary, open source).

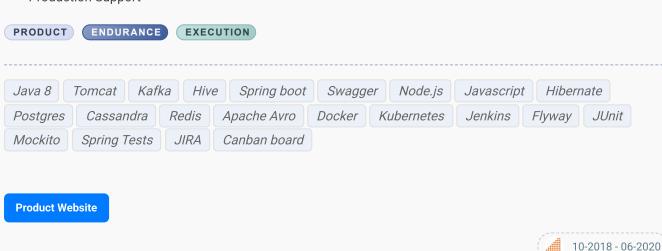

- Lead Developer for Refactoring the Main Product of the company using a DDD inspired approach
- Redesigned & Implemented Platform Services to be configurable (turned it into microservice).
- Designed, Implemented & Tested Connectors, a flexible, scalable, fault tolerant microservices system to connect the Products to documents of various Cloud storage solutions Sharepoint, Box, Dropbox etc.)
- Played a key role in the recruitment process by conducting interviews and assisting in the selection of qualified developers.
- Mentoring & Coaching

SecureD

Secure-D detects and blocks even the most sophisticated types of mobile ad fraud securing mobile users and safeguarding mobile operators.

- Worked in an agile team using a scrum-like schedule, sprint based developing the platform
- Production Support

Dryad & Medusa Dryad is Upstream's pioneering mobile commerce platform. • Developed & Maintained Upstream's core products in an Agile team • Implemented features in an event-driven architecture at scale Production Support PRODUCT ENDURANCE EXECUTION RabbitMQ Event-driven Programming Guava Java 8 Tomcat Microservices Kafka Protocol buffers Spring boot Swagger Hibernate Postgres ElasticSearch Redis Python JIRA Canban board Docker **Jenkins** Flyway Spring Tests JUnit Mockito

e-PPS

Web-based collaborative system to facilitate the full lifecycle of a tendering process, for both buyers and suppliers.

Researched & Implemented customization on top of the existing platform

Project

CONSULTING

RESEARCH

09-2015 - 12-2015

Benelux Patent Platform

The aim of the platform is to serve as a common system for the National Offices of Intellectual Property of Belgium, Luxembourg and Netherlands.

- Developed the platform's back-office from the ground up (Backend + Frontend)
- · Created the search criteria functionality
- Led the data migration from Lucene to Elasticsearch ensuring 100% data correctness

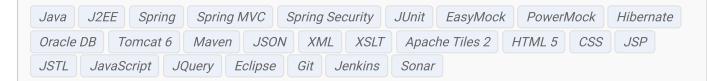

CONSULTING EXECUTION Spring MVC | Spring Security | JMS Spring JUnit EasyMock **PowerMock** SQL Server 2008 Tomcat 7 Lucene **JSON** XML XSLT Maven Apache Tiles 2 HTML 5 CSS JSP JavaScript JQuery **Eclipse** Git **Jenkins** Sonar **Belgium Netherland** Luxembourg 06-2013 - 06-2015

Eleura Platform

Electronic dossier collection of electronic documents and their preparation for upload into the European Parliament's ARCDOC archival system.

- Delivered search with pagination in documents
- Improved the performance of search by 4x

CONSULTING EXECUTION

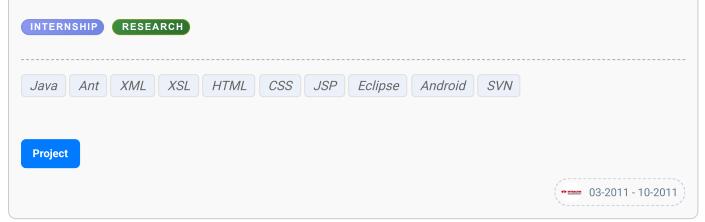

10-2012 - 05-2013

PAMAP

PAMAP Physical Activity Monitoring for Aging People is a Health Monitoring and Personal Health Record system.

- Developed mobile client that used PAMAP's infrastructure to access PAMAP's services
- Conducted Research around HL7 protocol to standardize PAMAP's communication so it can easily exchange data with other medical systems
- Generated a new web interface for PAMAP using XSLT and CSS

Education

Bachelor of Science (BSc) in Computer Science

Athens University of Economics and Business

2006 - 2011
